Albamont Wonder

ROSE COLLECTION

Twelve good strong two-year-old field-grown plants

PRICE \$5.00. Sold as a group only at this price

1. Betty — glowing coppery rose suffused with a golden sheen.
2. Columbia — pleasing rose pink, delightfully fragrant.
3. Duchess of Wellington — intense saffron yellow, stained deep crimson; very fragrant.
4. Etoile de France — large dark crimson, very popular.
5. Frau Karl Druschki — the ideal hardy white rose.
6. Jonkheer J. L. Mock — large deep imperial pink.
7. Killarney Double White — pure white, a beautiful rose.
8. Lady Alice Stanley — beautiful coral rose, fragrant.
9. Lady Hillingdon — free-flowering, apricot yellow.
10. Mrs. Aaron Ward — fragrant, double, Indian yellow.
11. Radiance Red — bright cerise red.
12. Sunburst — rich yellow, shaded with orange.

PLANTING INSTRUCTIONS

Roses can be planted in the early spring or in the fall before the ground freezes. Roses are heavy feeders and the beds should be well prepared, spading it very deep and manuring heavily with well-rotted manure. The beds should be well drained. Plants should be set 18 inches to 2 feet apart and the collar or place where it is grafted should be 1 inch below the surface. When setting, spread the roots over as large an area as possible and work the soil amongst them. Then tread the soil down firmly and water thoroughly. Keep them well watered until well established. A top dressing with ground bone early in the spring and again about July 1st is very beneficial. A summer mulch of peat moss will keep the bed from drying out quickly. New plants should be cut back to within six inches of the ground. Old plants should be pruned in April, cutting them back one half to two thirds of the previous season's growth.

For winter protection, hill the earth up around the plants 8 or 10 inches deep and when this is frozen cover the bed with strawy manure or leaves.

ALBAMONT WONDER

Perennial Collection

Compton, N. H.

Twelve strong field-grown hardy plants
PRICE \$2.00. Sold as a group only

1. Coreopsis Lanceolata
2. Light Blue Albamont delphinium
3. Dark Blue Albamont delphinium
4. Gaillardia or blanket flower
5. German Iris
6. Michaelmas Daisy
7. Lychnis
8. Liatris
9. Lupin
10. Oriental Poppy
11. Pyrethrum or Painted Daisy
12. Sweet William

CULTURAL DIRECTIONS

Spring and fall are both ideal times to plant hardy perennials. If planted in September and October they become well established before the ground freezes, with the result that the following spring they start to grow as soon as the weather moderates.

Perennials thrive well in almost any soil and if protected during the winter with a little barnyard manure and litter or straw and given an application of ground bone early in the spring and again about July 1st, they will grow profusely.

ALBAMONT WONDER

Hardy Phlox Collection

Albamont Gardens
Campton, N.H.

Twelve strong two-year-old field-grown plants,
all different

PRICE \$2.00. Sold only as a group at this price

1. Annie Cook — beautiful pale lavender with rose eye.
2. Athis — very fine deep clear salmon.
3. Beacon — bright cherry red.
4. B. Compte — brilliant rich French purple.
5. Bridesmaid — pure white with large crimson eye.
6. Firebrand — brilliant orange scarlet.
7. LaVague — lavender pink with carmine eye.
8. Mme. Paul Dutrie — soft pink.
9. Mrs. Jenkins — pure white.
10. Rijnstrom — lively shade of rose pink.
11. Sir Edward Landseer — very bright crimson.
12. Thor — deep salmon pink with aniline red eye.

CULTURAL DIRECTIONS

In the hardy plant line there is nothing which will give you a bigger show than a planting of hardy phlox. They are the most effective and useful plants in the garden during the late summer and fall. Everyone loves their gorgeous brilliant colorings. To grow phlox well the soil should be well drained, deeply spaded and enriched with well rotted manure or bone meal. Set the plants 10 inches apart in rows 3 feet apart. Never let the plants go to seed. Never water overhead but keep blooms and leaves dry. Let hose run slowly on the ground and thus prevent mildew.

23. Sidney Plummer — Soft yellow suffused pink, large ruffled flower.
24. Sydonia — rich claret purple, makes a beautiful companion to Schwaben.
25. Tyco Zang — Very tall spike with large brilliant salmon pink flowers.

CULTURAL DIRECTIONS

Gladiolus are the most adaptable of all garden flowers. They are easy to grow and bloom readily in any soil or climate. It is best to use a new location each year and the ground should be prepared early in the spring. Spading it deeply and pulverizing it thoroughly. Never use fresh manure, but well-rotted manure or a high grade potato fertilizer can be used with good results. If you set the bulbs six or seven inches deep, it will keep plants from falling over at blooming time. Bulbs may be planted in rows or beds spacing them from four to six inches apart each way. By successive plantings two weeks apart from May first to June fifteenth, blooms may be had all summer. Occasional top dressing with bone meal produces good results. Cultivate frequently and keep well watered but do not overwater. If you cut the blooms use a sharp knife, leaving at least three or four leaves to develop the bulb, and cut with a downward stroke so as not to disturb the growing bulb. Bulbs should be dug before the ground freezes, carefully dried, and stored in shallow boxes in a cool dry cellar at a temperature of about 40°.

Albamont Wonder Collection

of Hardy Shrubs

Eight popular varieties for \$3.25
Sold only as a group at this price
All strong two-year-old bushes

1. Cydonica Japonica — Japanese flowering quince, flowers April, May; scarlet.
2. Deutzia Pride of Rochester — pink flowers in June.
3. Forsythia Intermedia or Spectabilis — flowers April, yellow.
4. Hydrangea P. G. — flowers August, white.
5. Lonicera Tartarica — Red — flowers May, June, red.
6. Philadelphus Coronarius — mock orange, fragrant, white, flowers May, June.
7. Spirea Van Houtin — very free-flowering, white, May, June.
8. Weigelia Rosea — showy pink flowers, June.

CULTURAL DIRECTIONS

Have the ground ready before arrival of shrubs. If the roots are dry let them soak in water for five or six hours before planting. Set bushes as deep or deeper than they stood in the nursery. Be sure the hole is big enough and spread the roots out carefully when planting. Partly fill the hole, then tread down, then fill to within three inches of the top; tread again and fill balance with water. After plant is established, complete filling hole. A half pound of bone meal applied early in the spring and again about the first of July to each shrub will keep them growing well.

The Albamont Wonder Collection

of

Choicest Annual Flower Seeds

Should produce enough plants to cover 3000 square feet or more

In this Albamont Wonder Flower Collection we have a selection of popular flowers which will produce continual bloom throughout the summer. They are all easy to grow and with little care bloom profusely, making a gorgeous color display the beauty of which is difficult to describe with words.

Following are the varieties—

1. AGERATUM, imperial dwarf blue.
2. ANTIRRHINUM, (Snapdragon), extra choice mixed.
3. ASTER, giant comet, finest mixed.
4. ASTER, Peony flowered, perfection mixed.
5. ASTER, improved sunshine, beautiful new variety.
6. BALSAM, double Camellia flowered.
7. CALENDULA, finest mixed.
8. CALLIOPSIS, finest mixed.
9. CANDYTUFT, Choicest mixed colors.
10. COSMOS, hybrid early flowering mixed.
11. CYANUS, (Bachelor's Buttons) selected double mixed.
12. ESCHSCHOLTZIA, (California Poppy), brilliant mixed.
13. GAILLARDIA, best annual mixed colors.
14. GODETIA, extra choice double mixed.
15. LARKSPUR, double Stock flowered branching, extra choice mixed.
16. LAVATERA, loveliness, deep rose.
17. DWARF GIANT AFRICAN MARIGOLD, Fistulosa type, mixed double
18. DWARF FRENCH MARIGOLD, double mixed.
19. PETUNIA, hybrida, choicest mixed.
20. POPPY, double Peony flowered, mixed.
21. POPPY, single Shirley, wonderful variety of colors.
22. SALPIGLOSSIS, choicest mixed.
23. SAPONARIA VACCARIA, rose, fine for cutting.
24. SCABIOUS, double mixed.
25. ZINNIA, giant Dahlia flowered, superfine mixed.

These 25 different kinds of flower seeds are put up in separate packets each numbered and named and enclosed in a large beautifully colored lithographed envelope. Full cultural directions are given.

If you bought these seeds in the usual way they would cost you at least \$2.50, even if you bought them in a 5 and 10 cent store, and we feel positive you would not get anywhere near as choice a strain of flowers as ours. If you do not want so many flowers divide with a neighbor. You certainly cannot buy more for so little money elsewhere.

Visitors are always welcome at Albamont. While we have the largest and most beautiful displays at Albamont Gardens during the summer blooming season, we do have pretty flowers during the entire winter in our Greenhouses. A trip to Albamont is sure to be interesting and worth while at any season of the year. We extend you a cordial invitation.
